THE ESSENCE OF PEARL, and

the PEARL DENTRIFIC, prepared by JACOB
HEMET, Dentist to her Majesty and the Princess Amelia,
which for some Time past has been experienced by the No-
bility, Gentry, &c. to have the desired Effect in cleaning
the Teeth and Gums. Their Compositions are of the softest
and smoothest Kind, free from any Thing that is in the least
Degree injurious, will perfectly cure the Scurvy in the Gums,
preserve the Teeth in a perfect sound State, free from Rot-
tiness and Decay, will render the foulest Teeth white
and beautiful, and take off all disagreeable Smell from the
Breath, soften those Teeth which are loose, and prevent
those which are already decayed from growing worse; will
ease and greatly prevent the Tooth-Ach; nor has any so
truly valuable a Remedy ever before been offered to the Pub-
lic, for the using of which, there are proper Brushes.

A L S O,

Under Sanction of the King's Patent, a very useful Article
that has been long wanting, viz. A Composition in a solid
Form, for making an excellent shining LIQUID BLACK-
ING for Shoes, Boots, &c. — It is in small flat Cakes, one
of which scraped to Pieces, is sufficient to make a Pint, the
Water being poured on when boiling hot; and may be used
as a Ball with one Brush only: It preserves the Leather,
prevents it from cracking or growing hard, keeps out the
Wet, and will not in the least soil the nicest Stocking.

A L S O,

A large assortment of hosiery,
millenary and harberdshery; a neat assortment of
muffs and tippets, and ermine trimmings, ribbons,
laces, gloves, and fans; the newest pearl'd earrings,

TRIESTE, JULY 25.

THE last letters from the Levant advise, that
four Russian men of war came lately very
near the port of Smyrna; but that the difficulty
of getting safe through the sand banks at the en-
trance of that harbour, made the commandant
of those ships give up his enterprise, and rejoin
the rest of the Russian Squadron.

The same letters say, that the Russians are for-
tifying the islands which they have possessed
themselves of in the Archipelago, especially
Paros and Naxos.

Constantinople, July 17. The 16th inst. the
brother to the Grand Vizir set out from hence
for the army. He is said to be charged by the
Grand Seigneur to repair to Field Marshal Count
Romanzow with articles of peace. What has
given rise to this report is, that the day of his
departure just before he set out, a grand council
was held in presence of the Sultan, to consider
of a proposition of that monarch, whether
it would not be more expedient to conclude a
peace with the Russians, without the mediation
of any power, as many inconveniences might
arise from such mediation to this empire.

We are assured that only a part of the
army, under the command of the Pachas of
Damascus and Aleppo, hath been defeated by
that of Aly Bey, and that the remaining part
being reinforced by a Prince of the Druses,
who inhabit the mountains of Lebanon, has
gained a complete victory over the Usurper,
and besides taking a considerable booty, the
city of Damascus hath surrendered to the con-
querors.

Temeswaer, July 22. Letters from Constan-
tinople advise, that they hourly expected the ar-
rival of M. Czerni, Marshal of the Confederacy
of Cracow, whose business is said to be to sup-
plicate the Porte, in the name of all the Confe-
derates of Poland, that they may be comprehend-
ed in the treaty of peace now under considera-
tion between the Porte and Russia.

Venice, Aug. 4. It is reported here as a truth,
that the grand Russian army, commanded by
General Romanzow, hath gained a complete
victory over that of the Grand Vizir, that the
latter had abandoned his camp, and that several
Bashaws have been taken prisoners.

Warsaw, Aug. 10. A certain adventurer,
named Cassakowski, after having done great mis-
chief in Lithuania, is gone into Courland, where

he hath already plundered several villages. The
Dissidents have suffered much on this occasion.
'Tis added, that the malcontents of Courland
have advanced him 26,000 rix dollars, to ena-
ble him to march to Mittau in order to depose
the grand Duke.

We have accounts from Count Romanzow's
army, that on the 14th of July 25,000 Turks
passed the Danube near Giurgowo under the
Bashaw of Silistria, but that they were so well
received by the Russians that hardly 3000 repassed
it.

Warsaw, August 10. We have accounts from
Count Romanzow's army, that on the 14th of
July 25,000 Turks passed the Danube near the
Hurgeo, under the Bashaw of Silistria, but
that they was so well received by the Russians
that hardly 3000 repassed it.

Aug. 10. We are informed that the Russian
fleet in the Black Sea has taken, burnt and sunk,
a convoy of 150 Turkish vessels, which were
carrying troops and provisions to different places.
It is confirmed that the grand Russian army in-
tends to pass the Danube, in order to march to-
wards Salonica, and in conjunction with the Rus-
sian fleet to approach Constantinople, without
taking the route of the Dardanelles.

Warsaw, Aug. 12. We have received certain
accounts that the whole Crimea is now in the
power of the Russians, and that they have al-
ready sent troops from thence over the canal of
Caffa to Asia, to take Cuban.

Breslau Aug. 12. The Russians have open-
ed the campaign in Georgia. Prince Salamon,
who has joined them, has laid siege to the
castle on the island of Copp, which makes a
most vigorous defence.—According to some
advices the Regent of Persia has assembled an
army under the walls of Tauris, with intent
to watch the motions of the Georgians.

The last accounts from Poland mention, that
the Empress of Russia has sent a courier to Ber-
lin, to notify to his Prussian Majesty, that she has
rejected seven of the preliminary articles which
were sent by the Porte, and that she will not
agree to any cessation of arms during the negoci-
ation.

Frontiers of Poland, Aug. 13. The mail from
Warsaw of the 10th instant, is not yet arrived,
but a letter from Choczim, dated July 18, im-
ports, that the Russians had again rendered them-
selves masters of Giurgowo, and the particulars
of that conquest were hourly expected.

LONDON, August 26.

The plan of a new town which is to be settled
on the junction of Ohio, at present engages the
attention of many persons of distinction; Lord
Eglington is to be the director, as his Lordship
is possessed of vast tracts of land in those parts.
Several families are ready to embark, and those
not of the meaner kind. It is to be formed into
a regular government. It is expected it will be
as flourishing a city as any in those parts. Se-
veral persons of rank are making interest already
for posts on this proposed establishment, for their
dependents.

AUGUST 28.

Advices are received of terrible damage being
done by the high winds last week on the French
coast, four large ships having been wrecked be-
tween Barfleur and Cape la Hogue.

La Cormorante, a French sloop of war, from
Dominica to Rochelle, is lost off the Madeiras
and all the crew perished.

A remarkable trial came on at Lestwithiel, in
Cornwall, the last session, between a Lieutenant
of the Militia, plaintiff, and the son of a Mer-
chant of that county, defendant. The case was
as follows: The plaintiff had treated the de-
fendant with the opprobrious epithet of
scoundrel; the defendant, conscious to himself
that he did not merit the title, returned the affront
by pulling the plaintiff's nose; in consequence
of which a trial ensued. After a few learned
arguments on the occasion, the Court ordered

that the plaintiff should ask pardon for treating the defendant with such unpolite language; after which, the defendant should ask pardon for making so free with the plaintiff's nose, and to pay sixpence fine. With this sentence both parties complied, and thus the affair ended.

Monday a man, said to be of some repute, surrendered himself into the custody of the keeper of Wood Street Compter, as being concerned, with others, in setting the Dock Yard of Portsmouth on fire some time ago; he was the same evening privately examined before the Lord Mayor, and ordered back for another examination on Tuesday night; but about six o'clock on Tuesday evening he sent a note to his Lordship, desiring to be excused appearing before him again till last night, which was granted; and it is reported, that yesterday morning the said person declared, there was a French frigate lying off Portsmouth, ready to take on board him, and the rest of the persons concerned in setting fire to the Dock Yard at Portsmouth.

Extract of a Letter from the Hague, August 20.

"According to the last advices from Stockholm, a misunderstanding hath arisen between the King and the Senators of Sweden concerning the restoring the Chambers of the Senate, which were removed during the time that the last Diet was held, the Senators claiming their former employments. The King told them that he could not acquiesce in their claims without lessening the respect due to the memory of his father and to his own authority, unless they retracted the expressions they had made use of. Upon their refusing to do this, the King sent for the Orators, and ordered them to tell the Senators in his name, 'That being born a Swede, he knew perfectly well the extent of their power, which he would never permit them to make an ill use of, but was absolutely determined to proceed in every thing agreeable to the Laws and Constitution of the Kingdom.' This Declaration, which was made by his Majesty with great resolution, being signified to the Senators, staggered them so much, that they are at a loss how to act so as to reinstate themselves in his Majesty's good graces.

By the Ship Grace, Capt. Chambers, mentioned in our last, we have the London Prints till the 14th of September, which contain the following Advices.

Petersbourg, Aug. 9.

SOME very violent storms have lately fallen here. The Lightning struck a Galley in the Port where they lay, and the Fire communicating itself to others, 26 galleys and half galleys were consumed, with a great quantity of stores and ammunition. The loss is computed at half a million of rubles.

Petersburgh, Aug. 9. Lieut. Gen. de Tottleben who lately arrived here from Asia, has met with a most gracious reception from the Empress. That General not only reduced in two campaigns under the dominion of the Imperial Crown of Russia, the kingdoms of Georgia, Mingrelia, Imirette, and Gurie; but also made himself master of all the Ottoman fortresses along the Black Sea, as far as Travessund, and with a small body of Russian troops defeated all the Turkish troops he met with. That General will soon set out again upon an important expedition, and his son, who is made a Captain of horse, is gone before to join the general army upon the banks of the Danube.

Bastia, August 19. Twenty-two Corsicans, headed by one Marso Aquavia, all of whom escaped from the French, by wading over the river of Provence, near Nice, landed lately near Cape Corse, in the plain of Sisco, and began to assassinate all the French they met with. As soon as this was known at Bastia, a detachment was sent against them, but they retired into the Mountains.

Leghorn, Aug. 21. The affairs of the Sultan do not seem to mend on the frontiers of Georgia. By letters from Tertus we are informed, that Prince Salomon surmounts all opposition in his rout, and that head advances by speedy marches to the black Sea, whilst Prince Heraclius having joined the Russians, pursues the conquest of Ottoman Armenia. The arrival of this News at Constantinople, makes peace very desirable there, and the more so, as the Persians have seriously menaced the Turkish frontiers. The present circumstances of the Ottoman court, together with the secret Negotiations with the Emperors of Russia, and the Sophi, give some colour of truth to this last piece of intelligence.

Vienna Aug. 28. Yesterday the Emperor left Luxembourg, and set out for the Camp at Pest, in Hungary.

Hague, Sept. 3. Copy of a letter from Petersburg, dated Aug. 13, to his Excellency Prince Gallitzin. "According to the last accounts from the second army, Balaklava and Belby, two fortresses and ports in Crimea, the first of which is considerable on account of its situation, for the security of the

harbour, have been taken possession of by our troops; so that all the fortified places of that Peninsula are now in our power; besides three other little ports in the Black Sea, which are not set down in the maps. The Tartars of Crimea begin to come from the mountains in order to return to their habitations, being busy in getting in the harvest."

Hague Sept. 8. Prince Gallitzin, the Russian Envoy at this place, has received a letter from Leghorn, dated Aug. 23, advising, that after the junction of the armies of Cheik Daher to those of Ali Bey, in Egypt, the army consisted of 60,000 men; and that a vast number of Arabs having joined him, he was actually marching at the head of 100,000 men, in order to conquer all Syria.

L O N D O N.

August 31. We hear that a few days since was presented to the honourable the Navy board, by order of the right Hon. the Earl of Sandwich, first Lord of the Admiralty, two very curious models; one of a floating dock, the other of a steering wheel, and received the approbation of the board. They were invented by Lieutenant Henry Savage, of the Royal Navy.

We learn from good authority, that the French King has issued orders for immediately manning and victualling twenty sail of the line, to be ready for service at the shortest notice.

Yesterday a packet, with some important dispatches was sent away to Falmouth, for General Gage, Commander in Chief of his Majesty's forces in North-America, to be forwarded from thence by a packet boat appointed for that purpose.

Sept. 7. The examination of the person on Thursday night, relative to the fire in Portsmouth dock-yard, before the Lord Mayor, Alderman Trecothick and Kennet, at which was present the Secretary to the Earl of Rochford, lasted a considerable time, but the man made no discoveries of any consequence; he asserted that he was blindfolded and led to the place by a certain Captain whom he could produce if he was sent to Portsmouth: He was told if he had any discoveries to make, by which the affair could be brought to light, so that the persons concerned might be convicted thereof, he should not only be admitted as evidence, but have all his debts paid, which, it is said, amount to near 1000l. He replied that he expected something more; but he was informed that his request could not then be positively granted. He gave no very satisfactory answers to any of the questions asked him; upon which the Lord Mayor ordered him into another room, with the officer in whose custody he was, till his Lordship and the gentlemen above mentioned had consulted how they should proceed in the business. In the mean time he was allowed some wine in the room to which he was sent, where he drank plentifully, and smoked his pipe, till ten o'clock at night: by which time every thing being settled with regard to the debt he was arrested for, and also what he had contracted in the spunging-house for eating, drinking, &c. which score it is said amounted to about 20l. A Messenger with his assistant came and took him from the Mansion House, and set off immediately with him for Portsmouth, to see if he can make the discoveries there which he has asserted he can.

A bold and spirited remonstrance, it is said, is preparing for the approbation of the Livery on Michaelmas-day next; and, if it should be approved, Mr. Wilkes is determined to go up to St. James's to know his Majesty's pleasure when he will receive it.

The prospect of an East-India war is so strong, that Heyder Ally has lodged 2,500,000 pagodas with a merchant at Fort St. George, to purchase the assistance of the English Company.

Six Couriers, with Letters to the French Charge des Affaires, have arrived since the Departure of the Count de Guignes. It is said the Count is soon expected to return hither.

His Majesty has appointed Major General Alexander Mackay to be Governor of Tynmouth and Clifford's Fort, in the room of Sir Alexander Agnew.

Vincent Cunningham, Esq. is appointed Fort Major of Plymouth Garrison.

His Majesty has made the following Promotions in the Army, viz.

Benjamin Bernard, Esq. to be Lieutenant Colonel of the 23d Regiment of Foot, in the room of James Blaquier, Esq.

Harvey Blunt, Major in the above Regiment, in the room of Benjamin Bernard Esq.

Edward Evans and John Jennings, Esqrs. are each appointed Captain of a Company in the same Regiment.

Daniel M'Alpin, Esq. is appointed Capt. of a company in the 60th regiment of foot, or Royal Americans.

Extract of a Letter from Prince Dolgorucki Commander in Chief of the Russian Army in the Crimea dated Caffa, July 29.

"All the Crimea is happily conquered. Kerizi and Janicola have submitted to the Arms of our Sovereign. We are Masters also of the Isle of Taman; so that nothing further remains for me

at present to do, but to maintain them. Having thus completed what I proposed, I am now employed only in providing a Twelvemonth's Provisions for my Army. I have already established a Magazine of Subsistence for five Months, in a Fort called Szaytyre, seventy Werstes from Precop."

Extract of a letter from Petersburg, August 21.

"The last Couriers that arrived from the second army brought the following accounts, viz. that the Turks who were in the fortresses of Taman, at the mouth of the sea at Asoph, on the side of Cuban, on the approach of the Russians asked for five days to consider whether they would capitulate, which they employed as has since been discovered in carrying off every thing that was valuable; so that the Russians entered the place without firing one shot. They found a Prince of the family of the Chan Schiren, who submitted to our Sovereign."

The Re-election of the present Lord Mayor is so generally conceived to be a matter of certainty by the citizens of this metropolis, that it is expected no other formalities will be observed on the occasion than the public ones, calculated rather to display the splendour of the metropolis, than essential to the appointment of their chief Magistrate.

Sept. 14. At the meeting of the Livery, held on Wednesday night, Mr. Archer in the Chair, the report from the committee who had been desired to enquire into the privileges of their fellow-citizens, was considered, and several resolutions respecting that matter, and the future elections of representatives to Parliament, was read and agreed upon, and directed to be laid before the common-Hall for their approbation; after which the following resolutions were carried almost unanimously:

Resolved, that it be recommended by this meeting, to the Livery in common-Hall assembled, to return Mr. Alderman Bridgen, together with the present Lord Mayor, to the court of Lord Mayor and Alderman, for their choice of one of them to be Lord Mayor of this city for the Year ensuing.

The Lord Mayor has received a letter from the Mayor of Bristol, informing his Lordship, that the man who pretends to have been an acting person in setting Portsmouth dock on fire, was at Bristol, and transacted some business for a gentleman in that place, at the time he pretends to have been at Portsmouth.

Extract of a Letter from Yarmouth, Sept. 11.

"A ship was lost last night about one Mile off at sea: she is a West-Indian laden with rum and sugar; her masts lay out of the water this morning; but she is now quite sunk."

Matthew Derenzey, Esq. is appointed Major in the 6th regiment of foot, in the room of Hamler Wade, Esq.

William Hurst, Esq. is appointed Captain of a company in the above regiment, in the room of Matthew Derenzey, Esq.

Lord North has declared he will not quit the helm till he has conveyed the political vessel into a quiet harbour. "I took the command (said he, lately to a naval friend) in the midst of a hurricane, and have almost reached a port of security; when I cast an anchor to my satisfaction there, the admiral may give the rudder to whom he pleases, and my best wishes for a prosperous voyage shall certainly attend the new captain."

A suppression of what is termed the rotten boroughs, and an allowance of representation to places of real consequence, will, we are assured, be moved for by Lord North early in the ensuing sessions, that the people may really discover the true friends of the constitution.

The pretended discoveries of Dudley and Britain, relative to setting fire to Portsmouth dock-yard, gain not the least credit at the West end of the town; but they are impatient to know how the hum will end.

Britain and Dudley are culprits deserving a severe punishment, whether they did or did not actually set fire to Portsmouth dock-yard.

Britain was a prisoner for forgery, and Dudley for debt, and their information is thought to be a scheme to get rid of their difficulties, and a release from confinement.

The British parliament are not to meet till after Christmas.

The Northampton East-Indiaman, lately arrived, hath brought over an Arabian Poney, extremely fierce and ravenous, valued at 3000 guineas, and the whelp, of a wild Tyger. In her passage she met with a storm, when both got loose. The horse killed one man and devoured him, and tore out the bowels of another, before they could secure him again. The whelp got upon the gib-boom, where it sat a considerable time, to the no small terror of the ship's company; at last a Sailor swore, if the Captain would give him a Cann he would

The whelp, it is supposed, had a strong sensation of its danger, and expressed its gratitude to its kind preserver, by permitting him to play with it with great familiarity, whilst to every other person, who approached him, he shewed the Ferocity of his Nature.

Amongst the many reports about the persons of high rank that are concerned in the fire at Portsmouth, it is said, that a certain great personage, who has long been the cat's paw of an unpopular junto, is very strongly suspected of having some concern about that business. People are tender in speaking out upon the occasion, but it is certain that he is, and for some time has been, in actual custody. His house is night and day surrounded by a strong guard, and when he is permitted to go abroad, he is constantly attended by a troop of light horse.

His royal Highness the bishop of Osnaburg, it is said, will shortly be created Duke of York.

It is said, in regard to the colonies, that all due obedience to the Mother Country will be insisted on, and that in return, every necessary assistance and protection will be afforded.

We are told that the AMERICAN TEA BILL will be repealed. It is certainly not worth while for England to quarrel with her colonies for so trifling a revenue as is raised in consequence of that act.

Extract of a Letter from Yarmouth, Aug. 22, 1771.

"We have had a ship wrecked on this coast, she was loaded with wheat and flour. It is not known as yet where she came from, nor where she was bound to: Our people went out last week a fishing for herrings, and found above 40 casks of wheat flour, 1 Cwt. and a half in each cask, and other materials belonging to a vessel. Upon some casks there was marked, Okleby and Baltimore, by that it is thought she came from New-England. There were no corpse found, only part of the cabin, the glass windows, &c."

NEW-YORK, November 7.

On Saturday the 26th ult. ended our Supreme Court, at which William Davison was convicted of Felony, and received Sentence to be hanged on the fifteenth inst.—William Johnson, and Margaret, the Wife of John Irvin, of Pettit Larceny, and were sentenced to be imprisoned for one Month.—Anthony Costigan indicted for Grand Larceny, but found Not Guilty; and Samuel Mount, was tried, but found Not Guilty on two indictments; the first for attempting to pass a counterfeit Bill of New Jersey, and the second for altering two other Jersey Bills of Credit, and attempting to pass one of them.

Governor Morris, James Linn, and Robert Morris, Gentlemen, were admitted to practise the Law in the Courts of this Province.

Capt. William Harrison, who arrived here on Sunday the 27th ult. in seventeen Days from New-Providence, in Lat. 33: 28, Long. 73: 53, saw a Wreck, without any Person on board, to the Westward, and ran close under her Stern; found her to be a Snow, New-England built; had lost all her Masts, except about twelve Feet of her Fore-mast:—she had neither Anchors, Cables, or any Kind of Rigging left, except the Main Ropes of her Bow-sprit;—had some small Spars lashed, and some Fire Wood lying on Deck;—had black Sides and Stern: her Hance Streak painted white, and Wath Boards red;—her two Larboard Dead Lights beat in;—saw two Chefts in the Cabin, her Hatch-ways were open, she was very light, had a Woman Head, and lost Part of her Waiste on the Starboard Side.—A high Sea running, and the Wind blowing very fresh, prevented Capt. Harrison from going on board, to make any farther Discoveries.

On Wednesday last the Sloop Jenny, Francis Lowndes, Master, arrived here in 19 days from Turks Island, in a very distressed Condition. Soon after they left the Island, the Captain and most of his People were taken sick, principally owing to their having eaten a poisonous kind of Fish at St. Thomas's. The Vessel about the same time sprung a Leak, sufficient to keep one Pump almost constantly going, and they have much Reason to believe that had they not fortunately fell in with Capt. John Wilson, (in the Brig George, bound from Philadelphia to Cadiz, on the 25th ult. in Lat. 37: 35, two Days out, all well,) who most generously assisted them, with what fresh Provisions, and other Necessaries they wanted, they could not have got the Vessel to Port, and therefore they consider themselves as bound in Gratitude to make this public Acknowledgment to Capt. Wilson for his Kindness.

Capt. Cribben, in the Bark Real Friend, from Liverpool, but last from Kinsale, spoke with the following Vessels on his Passage, Oct. 4, Lat. 34: 47, with the Brig Molly, Capt. Wilson, 35 Days from Liverpool for this Port and Philadelphia, the 12th, Lat. 34: 16, Long. 64, 30, with a Ship from the Granades for Gibraltar; Oct. 23, Lat. 35, Long. 68, with a Sloop from New-London for Antigua, 6 Days out; the 29th, Lat. 39, 71, with a Sloop from Nantucket, 6 Weeks out, and had got one Fish.

Capt. Wilson above mentioned sailed from Liverpool in Company with Capt. Semple for this Port, who is coming down ran aground,

which probably would detain him some Days.

Thursday last five Transports sailed from hence for Amboy, to take on board his Majesty's 29th Regiment for Augustine.

Friday Night Capt. Pell arrived here from Santa Croix, in which Vessel came Passenger Mr. Nicholas Cruger, of that Island, Merchant.

Monday last Week, the new Brig Betsey, Capt. Schermerhorn, sailed from hence for South-Carolina, in which Vessel went Passenger, the Hon. Col. Richard Maitland, Deputy Adjutant General.

His Majesty's Ship Lively, Capt. Talbot, sail'd on Monday for Boston; and the Lady Gage, Capt. Kemble for London.

The General Assembly of this Province is by Proclamation prorogued to the 4th Day of December now next ensuing.

October 22, the Sloop Catherine, Capt. William Humphries, arrived here in 62 Days, from Pensacola, on his Passage the 12th of Oct. Lat. 37: 50, Long. 72: 30, had a violent Gale of Wind from the N. E. at 2 P. M. lying to under his Fore-sail, ship'd a very heavy Sea, which drove in his Larboard broad Side, washed his Boat and Binnacle, with two of his People overboard, one of whom was drown'd; about 6 o'clock the Gale abated, and he steered his Course again, being short of Provisions, on the 19th Oct. he spoke a Sloop, Capt. Rogers, from Boston for Philadelphia, who supplied him.

On Tuesday Evening about 7 o'clock, three Oystermen, whose Names were Bradley, Darby and Vanderlip, all Inhabitants of this City, being in a Pettyaugre, loaded with Oysters, coming from the Narrows, were overfett and drown'd. The Bodies of two of them were taken up next Day, but the other (Darby, who we hear has left a Widow and 5 or 6 Children) was not found when this Account was sent.

Yesterday another Pettyaugre, with two Men on board was overfett in the East-River, opposite the Town. One of the Men got on the Bottom of the Vessel, and the other by swimming, (being immediately assisted) were preserved.

The Virginia Papers contain the Addresses of his Majesty's Council, of the Mayor, Recorder, and Aldermen of the City of Williamsburg, of the President and Professors of William and Mary College, of the Clergy of the Church of England, to his Excellency Lord Dunmore, Governor of Virginia, of his Appointment, and Arrival in that Colony. In these Addresses, his Excellency Lord Dunmore, the late Governor, is mention'd in the highest Terms of Respect. And the Governor in his Answers to some of them, very respectfully mentions New-York, and seems to regret his removal from it—Part of his Answer to the College is in the following Words—"And tho' I must acknowledge the Desire I had of remaining in New-York, from the sincere Affection I had conceived, and ever shall retain, for a Province, the People whereof had manifested so earnest an Inclination to make my Administration easy to me, and my Residence among them agreeable. I shall nevertheless exert my utmost Abilities to conciliate the Affections of the Colony, which I now have the Honour to preside over, &c."

On the 12th of October, his Excellency the Earl of Dunmore, Governor of Virginia, issued a Proclamation, dissolving the General Assembly of Virginia, the Reasons for which are not mentioned, nor any Thing of the Election of a new Assembly.

The General Assembly of New-Jersey are to meet at Burlington on the 20th of November.

The Lord Myde Packet, Capt. Goddard, sails this Day.

To be SOLD or HIRED,

A Negro woman of about 50 year's of age, who is a very good spinner, and washer, and understands all kinds of house work, or taking care of children: is sober, honest, careful and diligent, and as healthy and capable of work as can be expected, considering her age. She has plenty of good clothes, can read, and is very religiously inclined: The owner would choose to dispose of her to a person who would not use her with harshness and severity, nor put her to hard service, beyond her strength. Inquire of the Priates.

POET'S CORNER.

A Place for the following Lines is desired in the Poet's Corner.

A MODERN ADDRESS.
 O F Babel's fam'd City, We, learned and wife,
 Most freely address you, exempt from Disguise,
 This first Opportunity early embrace,
 To greet your Appointment to such an high Place;
 And under your Auspices, add to our Use,
 This fam'd Institution to guard from Abuse.
 Our Art, tho' in Myrr'ry always disguis'd,
 (Rever'd by the Wife, by the Foolish despis'd,) Has oft undergone the most underval'd Censure,
 From Misapprehensions of ignorant Men Sir,
 Who quite unacquainted with some of our Rules,
 Presum'd they might freely pronounce were Fools;
 But we trust, that from your most superlative Merit,
 Protection and Safety we soon shall inherit;
 And as you command us, each Day and each Hour,
 Shall cheerful perform all the Parts in our Power;
 For that very Purpose shall earnest implore,
 (And if he won't grant it, what can we do more?)
 The Architect Royal to give us a Ray
 Of his Wisdom, to lead, or by Night, or by Day,
 What really is meant by th' ineffable Sign,
 Why three Three combin'd make the Number of Nine?
 And as easily trace those mysterious Symbols,
 As Taylor's the Management learn of their Thimbles.

PROPOSALS

For PRINTING by SUBSCRIPTION. A WEEKLY NEWS-PAPER, entitled,

THE PENNSYLVANIA PACKET,

AND GENERAL ADVERTISER.

INSTRUCTION or AMUSEMENT are the points aimed at by writers of every denomination, in whatever sphere they move, or whatever rank they hold in the literally world. Under one or other of these classes, the productions of every author may be arranged. But as the generality are not at leisure to make themselves masters of any one branch of learning, which can properly be filled a science, much left to comprehend the whole body of literature, with all its various revolutions and improvements; the grand object is, to reduce these matters into a small compass, and to exhibit them to the attention of the Public in as close a view as possible. He that succeeds in performing this task, certainly discharges an agreeable, if not a very useful, office. It is for this reason, perhaps, that the modern News-papers, published upon the present improved plan, meet with more universal perusal than the voluminous works of the laborious learned, though of infinitely superior merit, and unspeakably higher importance.

With a view of contributing, in one and the same effort, to both these desirable ends of KNOWLEDGE and PLEASURE, the Subscriber requests the indulgent attention of the Public in general, and his Friends in particular, while he offers to their candid consideration the following

CONDITIONS.

- I. THE PENNSYLVANIA PACKET, and GENERAL ADVERTISER, shall be printed with elegant Types, properly adapted to the various articles of which it may consist; and on Paper, equal in quality and size to any News-paper published in this city.
- II. The freshest accounts shall be faithfully given of all occurrences, foreign and domestic: these shall be arranged in such order as to furnish a clear and comprehensive view of the present interests, designs, intrigues, and politics of every respectable State and Potentate in the world.
- III. All Letters, Essays, and Miscellaneous Pieces, sent to the Publisher, that may any way tend to discoveries in Science, improvement in the Arts, promoting Manufactures, or encouragement of Agriculture, shall be thankfully received and immediately inserted.
- IV. Advertisements, of a moderate length, will be inserted at Three Shillings each for one week, and One Shilling for each continuance; those of greater length at such proportionate prices as may be reasonable.
- V. This Paper shall be published every Monday morning early, and delivered to the subscribers in town at their respective dwellings. The first number shall be given gratis, and printed on Monday the 15th of November next, or sooner, if sufficient encouragement should offer.
- VI. The Price to Subscribers will be Ten Shillings per year.

JOHN DUNLAP. SUBSCRIPTIONS are taken in by the Publisher, at his Printing-Office in Market-Street, Philadelphia; Mr. Thomas Dundas, Reading; James Wilson, Esq; Attorney at Law, Carlisle; Benjamin Noxon, Esq; Noxonton; James Sterling, Esq; Burlington; Joseph Burroughs, Esq; Salem; Thomas Leaming, Esq; Cape-May; Mr. Samuel Purviance, Baltimore-Town; Richard Thomas, Esq; Sheriff, Charlestown, and William Rumsey, Esq; Bohemia, Cecil County, Maryland; Rev. W. Dunlap, King & Queen County, Virginia; Mr. H. Gaine, and J. Holt, Printers, and Messrs. Noel and Hazard, Bookellers, New-York; Mr. Richard Draper, and Messrs. Edes and Gill, Printers, Boston; Mr. Robert Wells, and Mr. Charles Crouch, Printers, Charlestown, South-Carolina; Messrs. Eismond and Walker, Printers in Bridgetown, Barbados; and by many other Gentlemen, whose Names will be particularized in our first Number.

Continued from our last.

THE vast advantages likewise that would result from civilizing the Indians, and engaging them in agriculture, must affect the most inconsiderate mind.—Various, but fruitless have been the attempts hitherto, of effecting this important purpose. While their wants are simple and few, and easily satisfied by hunting, and other natural employments, it will be difficult, if not impossible to induce them to the more operative arts of agriculture and mechanics.—The most natural method of accomplishing this point, is gradually to infuse into their minds, the artificial desires of civil life. The same people that will now toil in hunting, to enable them to purchase rum and frowds, would labour at the plough, when their present employments became unable to furnish them with those conveniences of life, which would make equally necessary to them.—Nothing can have so great a tendency to obtain this desirable end, as the laying out settlements, and the keeping a communication in the central parts of their country; by which means their youth might be educated, (their constant objection to it, from an aversion to their being removed from them, being by this means obviated) and nurtured in civilized manners—the train of mutual wants so necessary to society, might be diffused by the power of example and imitation, and some of the natives occasionally drawn off, and artfully incorporated and employed in those parts where their customs and manners would most probably be erased and altered.—This method has been successfully used in numberless instances, by the wisest states, and would undoubtedly be attended with similar effects in the present parallel case.

But should we waive the display of this advantage, there are other important considerations which must induce us to expect the favourable attention of great Britain to such an attempt. By a completion of the proposed navigation, the principal obstacles to the settlement of the interior country would be removed, the lands would be increased in value, and numbers would be immediately procured, who would rejoice to settle where so fair a prospect of advantage was opened.—It may with the greatest probability be asserted, that in the course of three or four years, there would at least be ten millions of acres of land petitioned for and granted, the quit-rents of which would amount to twelve thousand five hundred pounds pr. annum at the rate of two shillings and six pence pr. hundred acres.

The ample field which this communication would also open for commerce, cannot but affect every lover of his country. The ready conveyance of masts, timber, &c. with which these lands abound, and of which they must often be cleared for cultivation, would be of considerable profit to the first settlers, and assist them, by the sale, in procuring the necessities for agriculture. And when their surplus will admit of it, beef, pork, corn and provisions of all kinds, with hides, tallow, flax, hemp &c. will become more beneficial to their owners, by the advantage of a cheap conveyance to market.

In process of time it may reasonably be expected, that timber, plank, boards, staves, masts, yards &c. will be floated down in such abundance as will enable the merchants of New-York to supply great Britain on better terms than it can obtain them from the Baltic.—The Manufacture of pot and pearl ashes will be augmented in proportion to the extension of the navigable communication, and many other useful articles introduced.

A more enlarged channel would likewise be opened to the merchants of this city, who supply the country with European and west India goods, for the disposal of their various commodities; and the farmer would be enabled to purchase them at a lower price, and to receive them with more expedition and safety.—The extensive vent which the settlement of the interior lands, by means of this communication, would make for the manufactures of our Mother Country; and the advantages which this colony would receive from the great augmentation of her active commerce cannot but engage their united zeal, for the promotion of so important a measure.

The settlement and prosperity of the back country, will also promote the population, and enhance the value of the lands proximate to the capital. For in proportion to the extent of the commerce of the city, will the number of its inhabitants, and the demand for the necessities of life be augmented; and as these can be furnished from adjacent lands with greater facility and profit to their owners, such lands will be possessed of the strongest motives to induce their population and cultivation.

These reflections on an important subject, I humbly propose, Mr. Impartialist, to your consideration, not doubting but some of your abler correspondents will undertake its examination in a manner more adequate to its nature and consequence.—A more favourable opportunity for such an attempt, could never offer, than at a time when this city is blessed with a commercial Chamber composed of gentlemen who know the interest of their country so well, and are so ready to execute any scheme for its welfare.—To none more properly than to their august board can this interesting measure be referred. Their experience can

best determine its utility; their countenance and influence ensure it the speediest success. A collection, if it should be found advisable, might be easily made, for taking the levels, drawing the plans, and laying them, with an estimate of the expence, before the public.—Influenced by no other motive but the advantage he conceives it would yield to this country, the author of this letter, would readily subscribe fifty pounds to so useful an undertaking, and is convinced, from personal information, that many of his fellow citizens, would contribute much more largely on such an occasion.—

Whatever may be its success, the calm satisfaction flowing from a consciousness of having endeavoured to promote a measure which promises advantage to society, is a sufficient reward to every honest man.

FABRICIUS.

L O N D O N,

August 20. The last letters from the Straights seem to hint, that it has been discovered that Ali Bey, the Conqueror of Egypt, is secretly assisted with arms, &c. by Russia.

The Lords of the Treasury, in order to encourage the officers of the Crown in America to a faithful discharge of their duty, have it in consideration, to appoint some of the most approved Commissioners of the Customs from Boston, to be Commissioners in England and Ireland. The integrity of these gentlemen frequently endangered their lives, as the pious Bostonians make it meritorious to evade all the commercial imposts of the mother country.

A correspondent observes, that the whole business of parliament is now a private quarrel about places; the session opens and the Minister is attacked; the attack produces a defence; the defence opens fresh sources of accusation; and the prorogation arrives before any thing of consequence can possibly be done for the real advantage of the people.

August 22. We hear, that a privy council held a few days since, the appointment of a new Lord Chancellor was one real subject of consideration.

Notwithstanding we are informed by our public prints, that some important matters are in deliberation, it is confidently asserted that no national business whatsoever will be attended to, until after a masquerade at Southampton. Such charms has a masquerade for even a ministerial bosom.

August 28.

It is ridiculous in literary characters to be evermore endeavouring to give us a favourable impression of one form of government, in the preference to another; for if we would judge either wisely or fairly, we must allow every form to be good that is adapted to the genius of the people, and conducive to the public security, always remembering that the government which at certain periods would be the source of the greatest advantages, would be productive, at other certain periods, of the greatest evils, because there is not on earth two more opposite things than the meridian and declension of national prosperity.

However the struggles of liberty may be disappointed, says a correspondent, the people will persevere in the defence of their just rights. In Charles II'd reign, tho' Shaftsbury was obliged to fly, though Russell lost his head, and Sidney swelled up the catalogue of Ministerial murders, the flame of freedom acquired vigour by the temporary suppression, and from the ashes of despotism produced the present Phoenix of our constitution.

One of the King's Messengers, we are assured, with proper attendants, is gone into Scotland, in quest of some capital offenders, and another is dispatched into the West; and there is great reason to believe, that some of the persons concerned in the dreadful fire at Portsmouth, are of the former nation.

It is agreed on all hands, that the Royal Navy of this country was never in so bad a condition as at present. Every mark of respect and attention has been shewn to the army, and particularly to the guards, for purposes which may be easily guessed; but the navy have been neglected ever since the King came to the crown. In the memory of the oldest man living, the yards were never known to be so thin of timber as at present. Instead of 65,000 feet, which even Ministers confess ought to be always in readiness, there is not 12,000 in all the yards put together.

It is the common misfortune of almost every Englishman to be attached to some one party or faction, and to have adopted the political creed already established by his leaders; whence all the extravagance of that party, become his own: And if a second Solomon was to sit in judgment upon them, it would give him as much pain as an inquisition into his own sins.

The very perplexed state of the affairs in France, appears to be the best security to this kingdom against a speedy war.

A beautiful diamond stomacher, in which all kinds of insects, such as Bees, Butterflies, &c. are represented, is now making at an eminent Jeweller, for the intended Queen of Sweden.

An Irish Patent of Peerage is making out for Mrs. Autehinson, Lady to the prime Serjeant of the sister kingdom, in consequence of that Gentle-

man's parliamentary services in the support of Government.

It is confidently reported, that the late fanning in the East Indies, was an artificial one, and caused by some people who will be called before a British Court of justice, to answer for the same.—These matters have been blown, by a quarrel among the servants.

SEPT. 2. We are assured, that the true cause of the Count de Guigne's very hasty departure from this kingdom, was, that he had received certain information from his Court, that a discovery would inevitably be soon made of the Count's being privy to, and concerned in the late conflagration in Portsmouth Dock yard, when his personal safety would be endangered, as in such case, his privilege as Ambassador, by the law of nations, would not protect him.

Londonderry, August 11. Last Wednesday the ship Hopewell, Neal M'Gowen, commander, failed from this port, with a fair wind, for the Island of St. John's, with a number of families, going thither on the encouragement given them by Lieut. Governor Desbrisay, to settle on his lands in that island. The appearance of the people (mostly Presbyterians) was remarkably decent and orderly; and they embarked in high spirits; and great hopes are conceived, from this beginning, of settling so fruitful, healthy, and convenient a part of his Majesty's late acquired dominions.

To the Public.

THE SUBSCRIBER purposes, if encouraged, to teach the English Language grammatically. And, for the Satisfaction of those who may be disposed to encourage such a necessary Mode of Education, as that of instructing Youth, in the grammatical Knowledge of their native Tongue, confessedly is; he gives the following Sketch of the Plan which he has adopted.—When the Pupil can read fluently and write a legible Hand, he will be taught the English Accidence, or the Properties of the Parts of Speech, as divided and explained by the latest and most eminent English Grammarians; that is, DOCTOR LOWTH, DOCTOR PRIESTLEY, and others. After which, he will be taught how to parse disjunctively; then modally, and instructed in the Rules of English Syntax; and, when he is sufficiently skilled in them, to account for the Construction of Sentences in general, he will receive Lessons of false Spelling and irregular Concord, &c. taken from some classic Author, but rendered ungrammatical for the Purpose of trying his Judgment. When he has reduced these as near their Originals, as his Knowledge of Grammar will permit; he will be shewn all such Irregularities as may have escaped his Notice, either in the orthographical, or syntactical Part. These Lessons will also be selected from different Authors on various Subjects; and frequently, from the Works of those who are the most celebrated for the Elegance of their epistolary Writings; as this Kind of Composition, is acknowledged to be as difficult as any, and of greater Utility. The erroneous Part, in every Lesson, will likewise be modified. At one Time, it will consist of false Spelling alone.—At another, of only false Concord.—The next, perhaps, will consist of both.—The 4th may not be composed of either of them; but may contain some Inaccuracies, or Vulgarisms, &c.—The 5th may retain all the foregoing Improperities, and the last, none of them, of which the Pupil needs not be apprised, for Reasons that are too evident to require a Recital. To the preceding Exercises, will succeed others on the Nature and Use of Transposition.—The Ellipsis of all the Parts of Speech, as used by the best Writers, together with the Use of synonymous Terms.—A general Knowledge of all which, joined to Practice, will enable Youth to avoid the many orthographical Errors, Barbarisms, inelegant Repetitions, and manifest Solecisms, which they are, otherwise, liable to run into, and, in Time, render them masters of an easy, elegant Style, by which Means they will become capable of conveying their Sentiments with Clearness and Precision, in a concise and agreeable Manner; as well with Reputation to themselves, as Delight to their Friends.—Lastly, tho' the Pointing of a Discourse requires ripe Judgment, and a more intimate Acquaintance with the syntactical Order of Words and Sentences, than the Generality of Youth can be possessed of, to which may be added, the unsettled State that Punctuation itself is really in; so that very few precise Rules can be given, without numerous Exceptions, which would rather embarrass than assist the Learner: Yet, some general Directions may be given, in such a Manner, as greatly to facilitate so desirable an Acquisition; and they will be attended to, on the Part of the Tutor, in Proportion to the Succession of the Pupil. But he doth not mean to insinuate, that the most tractable, of mere Youth, can be perfected in all the Varieties of the Language in a few Quarters, as Perfection is not to be acquired by Instruction alone, any more than it is by Practice without Instruction. On the contrary, he knows, that it is a Work which requires considerable Time and close Application, on the Part of the Pupil; as well as great Care and much Labour, on the Part of the Teacher; and that all hasty Performances in Grammar, have a greater Tendency to raise a slender Superstructure, than lay a permanent Foundation. Much more might be said on the Advantages resulting from this Mode of Education, were they not so very plain, that they scarcely require mentioning, and that this is only a Sketch. However, it may not be amiss to observe, that the Pupils, by continually searching of their Dictionaries, in Quest of Primitives and their Derivations, as well as the constituent Parts of compound Terms; besides learning the Dependence that their native Language has on itself; will also treasure up in their Memories a vast Stock of Words, from the purest Writers: And, what is of infinitely more Value, their just Definitions; as every One of this Class will have Johnson's Dictionary in Octavo. Therefore, if it be true, that "He who knows most Words, will have most Ideas," and that on the "Right Apprehension of Words, depends the Rectitude of our Sentiments,"—May it not be presumed, that such a Plan, in its full Extent, bids fair for improving the Minds of Youth in necessary Knowledge, and consequently, is likely to produce intelligent Men, and useful Citizens?—The Consideration of which, is, with all due Deference, most humbly submitted to the respectable Public; by its greatly obliged and very humble Servant,

H. Hughes.

P. S. He intends, as soon as Opportunity will permit, to publish a Series of Ratios; calculated for converting, by Multiplication alone, any Sum of New-York Currency, or the Currency of any other Colony, into Sterling; but may be equally useful for finding the Value of a lower Currency in a higher; when the Difference between them increases, or decreases, as it does between Sterling and Currency.

JOHN WRIGHT.

Machine to dress FLOUR.

THE King has been pleased to grant unto JOHN MILNE, of Manchester, his royal letters patent, for all his colonies in America, &c. for the sole making and vending his new invented machines, for the dressing the flour of wheat, &c. which machines, are found to be of great utility by all persons who have them in use; they not only make the flour look better, but also make it use better, as they make it more lively, and will dispatch three times as much business, in the same time, as the common method of bolting with cloths. and they will do that business at one operation, which, to be done with cloths, requires several, for they will dress fine flour two seconds and three seconds, and clean the bran at one operation; or they may make two sorts, or only one sort of flour, by moving the partitions within the box just as the person pleases who attends it; and considering their duration are much cheaper than cloths. Also, his new invented machines for cleaning wheat, barley, &c. which takes out seeds, dust, &c. and will break and destroy smut-balls, and will give a brightness and lustre to the grain.

The said machines are to be sold by JOHN MILNE, and Co. at their house in Manchester; or by applying to James Milne (son of the said John Milne) who is now at Capt. Robert Sinclair's, in Maiden Lane, New-York.

To the PUBLIC.

HAVING had an experience of Mr. Milne's new invented patent machines, for bolting flour and cleaning wheat at my mill where they are now to be seen at work, at Long-Island, I think it my duty to declare, that they are a curious, expeditious, and elegant contrivance, and what, in my opinion, will answer every purpose for which they are designed, and likewise be of great service to the public.

CHARLESTOWN, South Carolina October 8.
We hear from Newberen, in North-Carolina, that his Excellency Governor Martin, has had the misfortune to bury one of his children and his nephew since his arrival in that province; and that he and his lady having been very ill, were gone to Core-Sound, for the recovery of their health.

ANNAPOLIS October 17.

On Monday last, the Honourable the Lower House of Assembly were pleased to take under consideration, a petition from sundry of the inhabitants of Charles County, complaining of an undue Election of Capt. Francis Ware and Mr. Josias Hawkins, jun. The charge against them was for treating, which being fully proved by the evidences, the House were pleased, by their Speaker, to signify to those two gentlemen, that their attendance was no longer required. A writ of election has since been issued to make choice of two members for the said county, to supply the present vacancy.

On Tuesday night last the Storehouse of Mr. Jonathan Plowman of Baltimore-Town, merchant was blown up—It happened, as we are informed, by a negro fellow's going in to make up the store keeper's bed in an upper room, and having set down a candle on or near two barrels of gun powder, they took fire; the Negro was blown to pieces, the store-keepers, who were below, were carried out of the house, but in what manner they cannot give any information.

PHILADELPHIA October 28.

By Captain Martin in the brig George, arrived here yesterday from Hispaniola, we have the following melancholy accounts: in lat. 23: 30, long. 59: 30, spoke Capt. Brown, in the brig—bound from Virginia to the Mole, who had sustained great damage in a hurricane which happened on the 25th ult. she had her masts carried away, and had been laid upon her beam ends about 36 hours; her cables were washed from the keel into the cabin by a breach of the sea, and her dead lights drove out; the Captain and the company were fifteen, without provisions or water, except a small piece of pork, which was luckily in the steerage; and they were in a most perilous condition. A brig and a sloop, both from the same place, came into the Mole dismasted. Two large schooners belonging to Salem were lost among the Keys, and all on board perished; also, a number, of other vessels were likewise lost on the Windward Islands.

A few days ago, a small sail boat was overfet, by a flaw of wind, on her passage from this city to Salem; by which accident Richard Hacket, Samuel Smith, and a lad were unfortunately drowned. Joshua Huddy, another passenger, after being in the water about three hours, got to shore in a small canoe. Hacket and the lad are since found. Both the deceased men were married and left a number of small children.

A Letter from Charlestown, South Carolina, dated the 10th Inst. mentions, Col. Loller, who lately resided in this City, was committed to Gaol for murdering his Wife, and that during his Imprisonment, he cut his Throat, whereby he immediately expired.

TWO new Dwelling Houses now building, at the Corner of Hunter's Quay, Wall-Street, to be let and entered the First of May next. Inquire of Doctor WM. BROWNEJOHN. 3 6

To the PUBLIC.

WHEREAS the Trustees of Queen's College, in New Jersey, at their Meeting in May last, (the Honourable Frederick Smith, Esq; presiding) did fix said College at the City of New-Brunswick, and at their last Meeting, held according to appointment of the former, on the fifth of this Instant, at the Place aforesaid, (his Excellency William Franklin, Esq; presiding) it was unanimously agreed, that in order to carry this Institution into immediate Execution, an able well qualified Person be elected, and appointed Tutor, to instruct the Students who shall offer themselves, in the learned Languages, liberal Arts and Sciences, in order to prepare them for the usual Degrees; and for that Purpose elected, constituted, and appointed, Mr. Frederick Frelinghouse, who is also to teach the English Language grammatically. The Trustees have likewise ordered that the Revd. Messrs John Light, Jacob R. Hardenbergh, and Johannes M. Van Harlingen together with the Tutor aforesaid, do take upon them the Government and Direction of said Institution, until a well qualified President can be procured. The Publick is therefore notified, that the said College will be opened on the second Tuesday of November next, at the Place appointed, where proper Attendance will be given. It is supposed that the Character of the Gentleman appointed Tutor is become so well known, by discovering his singular Genius in the Course of his Studies at Nassau Hall, (where he had a liberal Education) that it needs no farther Recommendation from us.—The Public may depend upon finding good and sufficient Board at private Houses at said Place, and as cheap (if not cheaper) than at any other Places where Colleges are erected.—As said College is calculated to promote Learning in general for the good of the Community, therefore the Gentlemen Students may expect to be treated with becoming Candour, without any Discrimination with Respect to their Religious Sentiments; and will also have Opportunity to attend the divine Worship of different Denominations in said City.—The Students offering themselves to enter said College, shall be admitted into such of the Classes as they shall be qualified for.

By Order of the Trustees.
